Why do people from around the world come to us for headache treatment?

The Diamond Headache Clinic is internationally renowned and was the first comprehensive headache program in the U.S. We have an impressive rate of success for more than 2,000 new patients every year. We provide individualized treatment for every kind of headache, including migraines, tension-type, and cluster headaches.

Easing your pain begins with an evaluation. We take an extensive personal history and perform diagnostic tests such as physical, psychological, and neurological exams. Depending on your symptoms, inpatient, outpatient, traditional, alternative, or a combination of therapies will be prescribed.

The Diamond Headache Clinic physicians lead our team of experts, which includes specially trained nurses, pharmacists, biofeedback therapists, physical therapists, dieticians, physician assistants, research associates, psychologists, and psychiatrists.

Your individualized treatment plan may include biofeedback training, medication, dietary education, relaxation exercises, regulation of sleep habits and meals, physical therapy and psychology/psychiatry referrals.

We accept many types of health insurance. For more information call 800-HEADACHE (800-432-3224).
